Bekins Minerals
Old Kirker Mine
Sec. 29 & 32, T. 37 S., R. 13 W.
Iron County, Utah
ACT-021-002

Dear Mr. Bradtford:

Both the map and the accompanying narrative of your proposed development work were excellently done and highly descriptive of your operation to be performed on sec. 29 and 32 of T. 27 S., R. 13 W., SLB&M. There are two additional items, however, which we would like included in your proposal.

One item is if you encounter any water, gas, or oil in the drill holes, that the producing section be plugged to prevent migration of fluids and that all holes over two and one-half (2 1/2) inches in diameter will be surface plugged with cement.

The other item is that in the event of no development of the coal resources, ~~that~~ the trenches will be filled upon abandonment to prevent hazards.

We do not feel these guarantees are overly restrictive and hope you share this view. This assurance will place your work in concert with the Mined Land Reclamation Act as well as demonstrating a mining responsibility.

Sincerely,

DIVISION OF OIL, GAS AND MINING
